Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims ~~17~~20, 23, 28-33, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 11284014, and further in view of GB 2,165,178.

JP '014 discloses a method of manufacturing a capillary boning tool comprising the steps of forming a cylindrical body, forming an orifice extending along a longitudinal axis of the body, and coating the orifice with polymer (abstract). The coating is has a thickness up to 2 microns.

JP '014 fails to teach without coating a major portion of an internal surface of the body portion and polymer consisting of polyoelfins.

However, GB '178 discloses coating the tip and exterior portion of the tip and not the major portion of the internal surface of the body for the purpose of preventing fusion between the wire and the bonding tool (page 2, lines 12-13).

Therefore, it would have been obvious to one of ordinary skill in the art at the time applicant's invention was made to only coat the tip portion without coating the major interior body portion as taught by GB '178, in JP '014, in order to prevent fusion between the wire and the bonding tool.

Allowable Subject Matter

3. Claims 27, 36-39 allowed.
4. Claims 21-22 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 17-23 and 27 have been considered but are moot in view of the new ground(s) of rejection.
6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1725

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
